

Network Security Fundamentals, Rev. 24.41

Course description

The HPE Aruba Networking Security Fundamentals, Rev. 24.41 course teaches you foundational security concepts and prepares you to take the exam to achieve the ACA - Network Security (ACA-NS) certification. The course describes common security threats and vulnerabilities and provides an overview of important security technologies. You will learn how to create a trusted network infrastructure with HPE Aruba Networking mobility solutions and switches. In addition to discussing device hardening, the course covers implementing security at the edge with AAA, basic roles and firewall policies, dynamic segmentation, and endpoint classification. The course will further explain basic threat detection technologies and how to collect logs and alarms, and use them to initiate an investigation.

Updates to the course went live on October 15, 2024, covering an introduction to the new Secure Service Edge (SSE) technology. See [Release Notes](#) for details.

Course ID	0001210364
Course format, Typical duration	Select one: VLT - Virtual Instructor Led, 4 days ILT - Instructor Led, 4 days
Skill level	Foundational (FND)
Delivery languages	English
Lab required	Yes
Related certifications	HPE Aruba Networking Certified Associate - Network Security
In preparation for these exams	Selected items from this course are included in these exams: HPE Network Security Associate Exam

Ideal candidate for this course

Typical candidates for this course are network or help desk engineers working in a customer or partner environment with six months to a year of experience in networking in both wired and wireless environments.

Suggested prerequisites

It is highly recommended that candidates have a basic understanding of networking and security concepts before taking this course.

Topics

- Security Threats and Security Strategy
- Security Technologies
- Hardening AOS-CX Switches
- Hardening AOS Devices
- Secure LAN Protocols
- Network Authentication and Encryption Technologies
- Edge Security with HPE Aruba Networking

Objectives

After you successfully complete this course, expect to be able to:

1. Protect and Defend:

- Define security terminology
- Harden devices
- Secure a WLAN
- Secure a wired LAN
- Secure the WAN
- Secure the Service Edge
- Classify endpoints

2. Analyze:

- Threat detection
- Troubleshooting
- Endpoint classification

3. Investigate:

- Forensics
